Han-Kwang Unveils New Fully Interactive Site

The new website for the North American market features the = complete range of Han-Kwang CO2 lasers currently offered through their extensive dealer = network.

[Han-Kwang USA](http://www.hankwangus.com/) = (Lombard, IL) announces the start-up of its new corporate website for the North = American market, <http://www.hankwangus.com/>. = This fully interactive site features the complete range of Han-Kwang CO2 lasers, = currently offered through the extensive dealer network of this company, Korea's = largest laser machine builder.

Other areas in the site include a full schedule of trade show = appearances, all company contact info for sales and service, downloadable specs and literature on the machines, pre-owned machine offerings plus a password-protected area for customers and dealers to check on order = status, download equipment manuals and submit engineering data in a secure manner.

Highlighting the new machines offered by Han-Kwang are the Series PS, PL and TL plate and tube cutters, recently introduced at the FABTECH 2009 Show in Chicago, where they received immediate interest from the market, owing to their unique features. Key among these features is the patented Han-Kwang Constant Beam Distance System (CBDS), flying optics, Panasonic resonator, Siemens CNC, motors and drives package and plate sizes up to 8 ft x 26 ft or tube sizes up to 6 in diameter x 24 in long. Enhancing the performance of Han-Kwang lasers are an assortment of plate handling robotics, as well as fully integrated pallet tower automation, all designed and built by Han-Kwang.
