Tube-Cutting Laser Systems

Featured In: [Chem.Insider Daily](#) | [Plant Maintenance](#) | [Plant Maintenance](#)

Wednesday, March 3, 2010

Han-Kwang introduces its Model TL 6015 tube-cutting laser system with:

- The ability to handle 24' long, 6.5" diameter workpieces up to 1/4" wall thickness in mild steel and 0.200" in stainless steel.
- A Siemens 840D CNC to control all functions of the machine.
- A maximum positioning speed of 4700 ipm for the X-axis and 120 rpm for the rotary A-axis.
- Auto Focus Control to automatically adjust the focal length of the cutting lens to accommodate variations in the materials being processed or changes in material feed.
- An automatic bundle-loading system with tube V-support, auto-centering rotary chucking system, laser cutting station and automatic parts removal station.

Egg Crisis 2010

5 hours ago

The situation is nothing to rival the coffee crisis of 2009 or the interoffice email crisis. We lost many good Cubites in the conflicts that ended with the dismantling of the Great Foam Wall.
